ABOUT

I am a Senior Data Engineer with 7+ years of experience building cloud data platforms, ETL/ELT pipelines, and analytics systems for large-scale logistics operations. Based in Greater Boston, I specialize in migrating legacy data architectures to modern cloud lakehouses, with deep expertise in Python, Apache Spark, and medallion architecture across AWS, Azure, and OCI. I am equally comfortable defining data strategy with executives and shipping production pipelines with engineering teams.

SKILLS

Python | PySpark | SQL | Apache Spark | Airflow | dbt | Docker | Git | FastAPI | AWS (Glue · EMR · S3 · Step Functions) | Azure (ADF · Synapse) | GCP | OCI | BigQuery | Databricks | Snowflake | Delta Lake | Kafka | PostgreSQL | Oracle | LLM Models | Medallion Architecture | Power BI | Tableau | Apache Superset | HL7 FHIR R5 | Data Governance

EXPERIENCE

Data Engineer 09/2024 – Present
Jadlog Logística (Geopost Group — Europe's #1 parcel network) Boston, MA (remote)

- Led end-to-end migration from on-premise Oracle/PostgreSQL data warehouse to Oracle Cloud Data Lake, achieving a **93% reduction in processing latency** (from hours to under 1 minute) and enabling near-real-time analytics across all business units.
- Designed and implemented a medallion architecture (bronze/silver/gold) in Databricks and OCI, standardizing data layers and enforcing governance, lineage, and observability across 5+ critical operational data domains.
- Engineered ETL/ELT pipelines using Apache Spark and Airflow on AWS Glue and EMR, supporting both batch and streaming workloads; deployed CI/CD with GitHub Actions for automated, reproducible platform provisioning.

Lead Data Analyst 02/2022 – 09/2024
Jadlog Logística São Paulo, Brazil

- Designed and operated a nationwide pay-for-performance program for 400 franchise operators, distributing **$2.8M annually** based on objective KPIs and improving last-mile SLA by 6% — required integrating multi-source data pipelines, building audit workflows, and conducting regional training for non-technical operators.
- Built a backend microservice that delivered individualized dashboards and on-demand Excel reports to each of 400 franchise units with per-unit authentication, achieving **70%+ adoption** and eliminating monthly manual reporting cycles; mentored 7 analysts across post-sales and back office.

Senior Business Intelligence Analyst 01/2021 – 02/2022
Jadlog Logística São Paulo, Brazil

- Re-engineered core ETL workflows in Oracle and PostgreSQL, **cutting processing latency from 43 to 17 minutes (60%)**; deployed Grafana for real-time pipeline monitoring, eliminating silent failures and improving data availability for peak-season operational decisions.

Business Intelligence Analyst 10/2018 – 01/2021
Jadlog Logística São Paulo, Brazil

- Built the operations BI environment from scratch: designed and automated 30+ Power BI dashboards across 400 franchise locations, developed national reporting pipelines via SQL + Excel VBA, and contributed to a **9% improvement in on-time delivery SLA** over the first year.

PROJECTS

Hospital-at-Home FHIR Architecture (Capstone Project) github.com/datamoro/tcc-hah-fhir-architecture
Distributed event-driven system for real-time physiological data ingestion and standardization: Apache Kafka → HL7 FHIR R5 transformation worker (LOINC-coded Observations) → TimescaleDB hypertable → async FastAPI with SMART on FHIR JWT auth, 8 Uvicorn workers. JMeter load test: 246 req/sec, 0% error rate at 500 concurrent threads. Full stack in one `docker-compose up`.

BRFSS Public Health Data Pipeline github.com/datamoro/bhrss-exploratory-analysis
End-to-end ETL pipeline on 457K CDC behavioral health survey records in legacy ASCII fixed-width format — a real-world healthcare data challenge. Python + PostgreSQL with strategic indexing + Apache Superset dashboards analyzing Social Determinants of Health (SDOH) disparities across income, race, and geography.

EDUCATION

MBA in Software Engineering 2026
Universidade de São Paulo - USP — São Paulo, Brazil

BS in Mechanical Engineering 2017
Universidade Presbiteriana Mackenzie — São Paulo, Brazil
